DataBridge™ Software
For Improved Yield at Chemical Facilities

Q: *"Traffic at our chemical facility often gets backed up, and transactions can be difficult to track, is there a better way?"*

A: *"*Yes, DataBridge™ Software offers a number of sophisticated solutions to improve transaction management at Chemical Facilities.*"*

Let's look at some key benefits you can achieve by implementing DataBridge™ at your chemical facility.

Improved Yield and Reduced Giveway

- Weigh multiple loads in a single pass while still being able to track containers individually
- Consistently optimize loading while reducing over-the-road weight limits
- Anti-cheat capabilities prevent fraud at the truck scale, saving money
- Ensure that all weighments are accurate by not allowing a transaction to be completed until liquid in the tanker is stabilized

Enhanced Traffic Management

- Keep traffic moving over your vehicle scales
- Drivers can identify themselves at the terminal, complete their weighing transaction, and receive a printed or electronic ticket all without leaving their truck
- Higher productivity and reduced operating costs
- Process trucks up to 30% faster

Seamless Data Integration and Monitoring

- Provides transaction history, analytical tools, advanced monitoring and alerts, and more
- Auditing features provide full transparency into transactions for inventory management and regulatory purposes
- Comprehensive reporting allows for accurate weighing and data reliability
- Formula fields with conversion factors offer flexibility in customization of weighment data
