## How to Measure Solubility and Metastable Zone

- Wu, H., Wang, J., Liu, Q., Zong, S., Tian, B., Huang, X., Wang, T., Yin, Q., & Hao, H. (2020). Influences and the Mechanism of Additives on Intensifying Nucleation and Growth of P-Methylacetanilide. *Crystal Growth & Design*, 20(2), 973–983. <https://doi.org/10.1021/acs.cgd.9b01325>
- Duffy, D., Barrett, M., & Glennon, B. (2013). Novel, Calibration-Free Strategies for Supersaturation Control in Antisolvent Crystallization Processes. *Crystal Growth & Design*, 13(8), 3321–3332. <https://doi.org/10.1021/cg301673g>
- Kim, I., Ma, X., & Andreassen, J. (2012). Study of the Solid-Liquid Solubility in the Piperazine-H<sub>2</sub>O-CO<sub>2</sub> System Using FBRM and PVM. *Energy Procedia*, 23, 72–81. <https://doi.org/10.1016/j.egypro.2012.06.056>
- Sathe, D., Sawant, K., Mondkar, H., Naik, T., & Deshpande, M. (2010). Monitoring Temperature Effect on the Polymorphic Transformation of Acitretin Using FBRM–Lasentec. *Organic Process Research & Development*, 14(6), 1373–1378. <https://doi.org/10.1021/op100177s>
- O’Grady, D., Barrett, M., Casey, E., & Glennon, B. (2007). The Effect of Mixing on the Metastable Zone Width and Nucleation Kinetics in the Anti-solvent Crystallization of Benzoic Acid. *Chemical Engineering Research & Design*, 85(7), 945–952. <https://doi.org/10.1205/cherd06207>
- Barrett, P., & Glennon, B. (2002). Characterizing the Metastable Zone Width and Solubility Curve Using Lasentec FBRM and PVM. *Chemical Engineering Research & Design*, 80(7), 799–805. <https://doi.org/10.1205/026387602320776876>

# Crystallization Design

- Sun, M., Shichao, D., Tang, W., Jia, L., & Gong, J. (2019). Design of Spherical Crystallization for Drugs Based on Thermal-Induced Liquid–Liquid Phase Separation: Case Studies of Water-Insoluble Drugs. *Industrial & Engineering Chemistry Research*, 58(44), 20401–20411. <https://doi.org/10.1021/acs.iecr.9b03795>
- Shi, Z., Hao, L., Zhang, M., Dang, L., & Wei, H. (2017). Gel Formation and Transformation of Moxidectin During the Anti-solvent Crystallization. *Journal of Crystal Growth*, 469, 8–12. <https://doi.org/10.1016/j.jcrysgro.2017.04.034>
- Kutluay, S., Şahin, Ö., Ceyhan, A. A., & İzgi, M. S. (2017). Design and Optimization of Production Parameters for Boric Acid Crystals With the Crystallization Process in an MSMPR Crystallizer Using FBRM® and PVM® Technologies. *Journal of Crystal Growth*, 467, 172–180. <https://doi.org/10.1016/j.jcrysgro.2017.03.027>
- Griffin, D. J., Grover, M. A., Kawajiri, Y., & Rousseau, R. W. (2015). Mass–Count Plots for Crystal Size Control. *Chemical Engineering Science*, 137, 338–351. <https://doi.org/10.1016/j.ces.2015.06.048>
- Saleemi, A. N., Steele, G., Pedge, N. I., Freeman, A., & Nagy, Z. K. (2012). Enhancing Crystalline Properties of a Cardiovascular Active Pharmaceutical Ingredient Using a Process Analytical Technology Based Crystallization Feedback Control Strategy. *International Journal of Pharmaceutics*, 430(1–2), 56–64. <https://doi.org/10.1016/j.ijpharm.2012.03.029>
- Kim, S., Lotz, B., Lindrud, M., Girard, K., Moore, T., Nagarajan, K., Alvarez, M., Lee, T., Nikfar, F., Davidovich, M., Srivastava, S., & Kiang, S. (2005). Control of the Particle Properties of a Drug Substance by Crystallization Engineering and the Effect on Drug Product Formulation. *Organic Process Research & Development*, 9(6), 894–901. <https://doi.org/10.1021/op050091q>

# Seeding Crystallization Processes

- Gong, W., Wu, Y., Lin, M., & Rohani, S. (2021). Polymorphism Control of L-Glutamic Acid in a Single-Stage and a Two-Stage MSMPR Crystallizer by Different Seeding Strategies. *Chemical Engineering Research & Design*, 170, 23–33. <https://doi.org/10.1016/j.cherd.2021.03.032>
- Zhang, D., Liu, L., Xu, S., Du, S., Dong, W., & Gong, J. (2018). Optimization of Cooling Strategy and Seeding by FBRM Analysis of Batch Crystallization. *Journal of Crystal Growth*, 486, 1–9. <https://doi.org/10.1016/j.jcrysgro.2017.12.046>
- Yu, Z. Q., Chow, P. S., Tan, R. B. H., & Ang, W. H. (2013). PAT-Enabled Determination of Design Space for Seeded Cooling Crystallization. *Organic Process Research & Development*, 17(3), 549–556. <https://doi.org/10.1021/op300319t>
- Aamir, E., Nagy, Z., & Rielly, C. (2010). Optimal Seed Recipe Design for Crystal Size Distribution Control for Batch Cooling Crystallisation Processes. *Chemical Engineering Science*, 65(11), 3602–3614. <https://doi.org/10.1016/j.ces.2010.02.051>
- Bakar, M. R. A., Nagy, Z. K., & Rielly, C. D. (2009). Seeded Batch Cooling Crystallization With Temperature Cycling for the Control of Size Uniformity and Polymorphic Purity of Sulfathiazole Crystals. *Organic Process Research & Development*, 13(6), 1343–1356. <https://doi.org/10.1021/op900174b>
- Deneau, E., & Steele, G. (2005). An In-Line Study of Oiling Out and Crystallization. *Organic Process Research & Development*, 9(6), 943–950. <https://doi.org/10.1021/op050107c>

## Optimizing Crystal Shape

- Kutluay, S., Ceyhan, A. A., Şahin, Ö., & İzgi, M. S. (2020). Utilization of In-Situ FBRM and PVM Probes to Analyze the Influences of Monopropylene Glycol and Oleic Acid as Novel Additives on the Properties of Boric Acid Crystals. *Industrial & Engineering Chemistry Research*, 59(19), 9198–9206. <https://doi.org/10.1021/acs.iecr.0c00551>
- Civati, F., Svoboda, V., Urwin, S. J., McArdle, P., Erxleben, A., Croker, D., & Ter Horst, J. (2020). Manipulating Cocrystal Size and Morphology Using a Combination of Temperature Cycling and Additives. *Crystal Growth & Design*, 21(3), 1496–1506. <https://doi.org/10.1021/acs.cgd.0c01195>
- Borsos, Á., Szilágyi, B., Agachi, P. Ş., & Nagy, Z. K. (2017). Real-Time Image Processing Based Online Feedback Control System for Cooling Batch Crystallization. *Organic Process Research & Development*, 21(4), 511–519. <https://doi.org/10.1021/acs.oprd.6b00242>
- Peña, R., & Nagy, Z. K. (2015). Process Intensification Through Continuous Spherical Crystallization Using a Two-Stage Mixed Suspension Mixed Product Removal (MSMPR) System. *Crystal Growth & Design*, 15(9), 4225–4236. <https://doi.org/10.1021/acs.cgd.5b00479>
- Jiang, M., Zhu, X., Molaro, M. C., Rasche, M. L., Zhang, H., Chadwick, K., Raimondo, D. M., Kim, K. K., Zhou, L., Zhu, Z., Wong, M. H., O'Grady, D., Hebrault, D., Tedesco, J., & Braatz, R. D. (2014). Modification of Crystal Shape Through Deep Temperature Cycling. *Industrial & Engineering Chemistry Research*, 53(13), 5325–5336. <https://doi.org/10.1021/ie400859d>
- Leyssens, T., Baudry, C., & Hernandez, M. L. E. (2011). Optimization of a Crystallization by Online FBRM Analysis of Needle-Shaped Crystals. *Organic Process Research & Development*, 15(2), 413–426. <https://doi.org/10.1021/op100314g>

# Monitoring Supersaturation

- Szilagyi, B., Eren, A., Quon, J. L., Papageorgiou, C. D., & Nagy, Z. K. (2020). Application of Model-Free and Model-Based Quality-by-Control (QBC) for the efficient design of pharmaceutical crystallization processes. *Crystal Growth & Design*, 20(6), 3979–3996. <https://doi.org/10.1021/acs.cgd.0c00295>
- Hu, C., Shores, B. T., Derech, R. A., Testa, C. J., Hermant, P., Wu, W., Shvedova, K., Ramnath, A., Ismaili, L. Q. A., Su, Q., Sayin, R., Born, S. C., Takizawa, B., O'Connor, T. F., Yang, X., Ramanujam, S., & Mascia, S. (2020). Continuous Reactive Crystallization of an API in PFR-CSTR Cascade With In-Line PATs. *Reaction Chemistry & Engineering*, 5(10), 1950–1962. <https://doi.org/10.1039/d0re00216j>
- Zhou, G., Moment, A., Yaung, S., Cote, A., & Hu, T. (2013). Evolution and Application of an Automated Platform for the Development of Crystallization Processes. *Organic Process Research & Development*, 17(10), 1320–1329. <https://doi.org/10.1021/op400187h>
- Duffy, D., Barrett, M., & Glennon, B. (2013). Novel, Calibration-Free Strategies for Supersaturation Control in Antisolvent Crystallization Processes. *Crystal Growth & Design*, 13(8), 3321–3332. <https://doi.org/10.1021/cg301673g>
- Barrett, M., McNamara, M., Hao, H., Barrett, P., & Glennon, B. (2010). Supersaturation Tracking for the Development, Optimization and Control of Crystallization Processes. *Chemical Engineering Research & Design*, 88(8), 1108–1119. <https://doi.org/10.1016/j.cherd.2010.02.010>
- Liotta, V., & Sabesan, V. (2004). Monitoring and Feedback Control of Supersaturation Using ATR-FTIR to Produce an Active Pharmaceutical Ingredient of a Desired Crystal Size. *Organic Process Research & Development*, 8(3), 488–494. <https://doi.org/10.1021/op049959n>

## Polymorphic Crystallization

- Yang, H., Kim, J., & Kim, K. (2019). Study on the Crystallization Rates of  $\beta$ - and  $\epsilon$ -Form HNIW in In-Situ Raman Spectroscopy and FBRM. *Propellants, Explosives, Pyrotechnics*, 45(3), 422–430. <https://doi.org/10.1002/prop.201900194>
- Kongsamai, P., Wantha, L., Flood, A. E., & Tangsathitkulchai, C. (2019). In-Situ Measurement of the Primary Nucleation Rate of the Metastable Polymorph B of L-Histidine in Antisolvent Crystallization. *Journal of Crystal Growth*, 525, 125209. <https://doi.org/10.1016/j.jcrysgro.2019.125209>
- Hansen, T. B., Simone, E., Nagy, Z., & Qu, H. (2017). Process Analytical Tools to Control Polymorphism and Particle Size in Batch Crystallization Processes. *Organic Process Research & Development*, 21(6), 855–865. <https://doi.org/10.1021/acs.oprd.7b00087>
- Takeguchi, K., Obitsu, K., Hirasawa, S., Orii, R., Ieda, S., Okada, M., & Takiyama, H. (2016). Effect of Temperature and Solvent of Solvent-Mediated Polymorph Transformation on ASP3026 Polymorphs and Scale-up. *Organic Process Research & Development*, 20(5), 970–976. <https://doi.org/10.1021/acs.oprd.6b00068>
- Liu, W., Wei, H., Zhao, J., Black, S., & Sun, C. (2013). Investigation Into the Cooling Crystallization and Transformations of Carbamazepine Using In-Situ FBRM and PVM. *Organic Process Research & Development*, 17(11), 1406–1412. <https://doi.org/10.1021/op400066u>
- Hao, H., Barrett, M., Hu, Y., Su, W., Ferguson, S., Wood, B., & Glennon, B. (2011). The Use of In-Situ Tools to Monitor the Enantiotropic Transformation of P-Aminobenzoic Acid Polymorphs. *Organic Process Research & Development*, 16(1), 35–41. <https://doi.org/10.1021/op200141z>

## Phase Separation (Oiling Out)

- Wang, S., Liu, Y., Guo, S., Yan, H., Li, K., Tong, L., Li, T., Chen, M., Gao, Z., & Gong, J. (2022). Design of Single and Multicomponent Drug Spherical Particles With Improved Powder Properties in Water Instead of Organic Solvents: A Case Study of Gemfibrozil. *ACS Sustainable Chemistry & Engineering*, 10(37), 12411–12422. <https://doi.org/10.1021/acssuschemeng.2c03982>
- Zhao, X., Webb, N. J., Muehlfeld, M. P., Stottlemeyer, A. L., & Russell, M. W. (2021). Application of a Semiautomated Crystallizer to Study Oiling-Out and Agglomeration Events—a Case Study in Industrial Crystallization Optimization. *Organic Process Research & Development*, 25(3), 564–575. <https://doi.org/10.1021/acs.oprd.0c00494>
- Sun, M., Du, S., Chen, M., Rohani, S., Zhang, H., Liu, Y., Sun, P., Wang, Y., Shi, P., Xu, S., & Gong, J. (2018). Oiling-Out Investigation and Morphology Control of  $\beta$ -Alanine Based on Ternary Phase Diagrams. *Crystal Growth & Design*, 18(2), 818–826. <https://doi.org/10.1021/acs.cgd.7b01293>
- Ren, R., Sun, D., Wei, T., Zhang, S., & Gong, J. (2014). The Role of Diastereomer Impurity in Oiling-Out During the Resolution of Trans-4-Methyl-2-Piperidine Carboxylic Ethyl Ester Enantiomers by Crystallization. *Organic Process Research & Development*, 18(6), 709–716. <https://doi.org/10.1021/op500026z>
