

Withdrawal of certification

June 2024

Sale Stop of UC3 scales with cash register

The decision to stop the sales process for UC3 scales was done after thoroughly analyzing the sale numbers.

This includes FreshBase and FreshWay scales with cash register option for France.

As the LNE certification and the yearly renewal is standard to stay compliant to the French law, we informed the LNE about the sales stop.

Withdrawal of certification

The certificate number 34604 revision 3 that we received from LNE is no longer active. This means, that the certification was withdrawn.

Current users of the cash register system, i.e. those whose installation predates the expiry date of the certificate, can still use the LNE certificate to prove that they are using a cash register system that complies with VAT BOI DECLA 30 10 30.

The MT cash register option is still compliant as long as the standard of the certification standards for cash register systems is in version 1.6.

If the standard changes to a higher version, the scale software for cash register is no longer compliant.
