## METTLER TOLEDO Dimensioning and Weighing Solutions

METTLER TOLEDO

## METTLER TOLEDO helps improve your Warehouse Operations

### Increase your inventory accuracy and enhance your operational capability

Responding quickly to fast-changing customer demands, improving productivity while increasing output, and growing requirements for more frequent deliveries with shorter lead times are challenges faced by warehouses.

These increasingly dynamic fulfilment requirements cannot be managed without accurate, real-time visibility of your inventory.

METTLER TOLEDO understands your challenges, providing you with automated dimensioning, weighing and identification solutions designed to increase your inventory accuracy, maximise your throughput and lower your operating costs.

### Achieve your business goals with a METTLER TOLEDO solution.

METTLER TOLEDO is the world leader with 20 years of experience in dimensioning solutions

### Improved Efficiency and Visibility

From the receiving to the shipping dock METTLER TOLEDO solutions provide you with real-time data and better decision-making tools.

#### Your benefits include:

#### 100% Real-time, Inventory Visibility

- Automatically register dimensions and weight of your inventory
- Improve storage planning
- Minimize un-needed and wasted space

#### 100% Shipping Accuracy

- Increase correct order rates with checkpoints to verify order data
- Improve service quality and order fulfilment times
- Automatically decide packaging requirements for lowest transport rates

#### 100% Control of Shipping Costs

- Invoice correct freight costs to your customer in advance
- Improve carrier selection criteria
- Collect shipping statistics that enable you to negotiate better prices with your transport company
- Increase load planning effectiveness

### Maximum Throughput

Our stand alone and integrated solutions meet the requirements of today's warehouses. With over 4000 systems installed we have a solution tailored to complement your existing material handling processes.

#### Static Solutions

- Compact and robust workstations
- Ideal for manual handling applications
- Measuring range: 25-1200 mm (1-47 in.)

#### Dynamic Solutions

- Versatile solutions for precise, in-motion measuring of various objects and shapes
- Singulated or mass package flow
- Measuring range: 50-3000 mm (2-118 in.)

**Static Solution**  
Modular design  
No extra PC required  
Integrated flat or roller table  
Measures > 400 items/hour

**Dynamic Solution**  
Hands-free - no operator required  
No split in belt required  
Bi-directional package movement  
Measures > 5000 items/hour
